OWAIS RAZA KHAN

Web Development | AI Automation | Software Projects
Kolkata, West Bengal, India • +91 9874743024 • owsrazakhan@gmail.com
www.linkedin.com/in/owaisrazakhan04 • leadzing.in

PROFESSIONAL SUMMARY

BBA student and founder of LeadZing who builds web applications, AI-powered tools and automation systems. Built JOBHUNT OS, an AI-powered job-search automation platform, using Next.js, React, TypeScript, PostgreSQL and Supabase, and designed, built and launched the LeadZing website independently. Uses AI-assisted development and LLM-based workflows to ship software efficiently, backed by business fundamentals in analysis, project planning and client communication. Targeting internships and entry-level roles in web/software development, AI automation and technology-focused business functions.

TECHNICAL SKILLS

Frontend & Web: Next.js, React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Responsive Web Development
Backend & Databases: Node.js, PostgreSQL, Supabase, Prisma, REST APIs, Authentication, Database Integration
AI & Automation: LLM Integrations, AI Workflow Automation, AI-Assisted Software Development (Claude Code), Prompt Engineering, API Integration, Automated Data Processing
Tools: Git, GitHub, Claude / Claude Code, Microsoft Excel, Google Sheets, PowerPoint, Word
Business: Business Analysis, Project Management, Business Communication, Research & Analysis, Data Analysis, Client Management, Entrepreneurship

EXPERIENCE

Founder — LeadZing | Kolkata, India (Remote) 2026 – Present
Web development and AI automation company — leadzing.in

- Plan and deliver client-facing web and digital projects from requirements and scoping through implementation, testing and release.
- Build and ship websites and landing pages with responsive UI implementation, applying AI-assisted development (Claude Code) for code generation, debugging and rapid iteration.
- Design AI-assisted workflows with Claude and Claude Code that automate research, outreach, data analysis and repeatable business operations.
- Develop brand and video assets for the company using AI generation tools (Higgsfield AI) alongside product work.

Independent Client Projects — Self-Employed | Remote 1+ Year

- Worked directly with multiple clients to gather requirements, plan deliverables and meet deadlines, including content work for MARKETHING.
- Managed client communication, outreach and lead follow-up while using AI tools to speed up production.

PROJECTS

JOBHUNT OS | Next.js, React, TypeScript, Tailwind CSS, PostgreSQL, Supabase, Prisma, LLM APIs

- Built an AI-powered job discovery and application automation platform that automates the job-search workflow: discovery, filtering, deduplication, candidate–job matching, resume tailoring, company research, recruiter communication and application tracking.
- Designed the automation pipeline: candidate profile → job search → filtering & deduplication → eligibility assessment → candidate matching → company/job research → resume tailoring → communication drafting → application tracking.
- Developed the full-stack application with a Next.js/React/TypeScript front end, a PostgreSQL database on Supabase accessed through Prisma, and LLM and external API integrations.

LeadZing Website | leadzing.in | Live production site

- Designed, built and launched a complete agency website independently: architecture, page structure, landing sections, responsive layout and copy.
- Used AI-assisted development for code generation, debugging and design iteration; maintain and update the site after launch.

AI Workflow & Automation Systems | Claude, Claude Code

- Designed and tested AI-assisted workflows for research, outreach, data processing and repetitive operational tasks.

EDUCATION

Bachelor of Business Administration (BBA) — iLEAD (Institute of Leadership, Entrepreneurship and Development), Kolkata Expected 2029
Higher Secondary (Commerce), Frank Anthony Public School — 71% | Secondary, St. Augustine's Day School — 79%

CERTIFICATIONS

Smart AI (English) — Advanced Professional Learning and Leadership (APLL) 2026
AI & generative AI fundamentals, prompt engineering, GPT models, AI image generation, AI video creation, NLP basics, AI in business.

Languages: English (Fluent), Hindi (Fluent), Urdu (Fluent)
